

1. Take flowers while protecting nature. This app is designed to allow you to catalogue flowers without picking them. You can maintain an independent book and keep track of where you saw these marvels. Due to the lack of needing to pick them, you allow others to enjoy them as well.  
Use the app to showcase all your adventures to your friends and allow them to see where you found it so they can enjoy it themselves.
2. FlowerPress
3. Description: This app allows you to enjoy the beauty of flowers and nature from your phone. It allows you to be a collector of flora and to reminisce of past adventures. Take it on the go and take pictures everywhere. Add descriptions and names for the pictures and show them off to your friends.

Features
